

Phylogenetic GLS (BM): Insular cortex (grey) vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit extrapolated

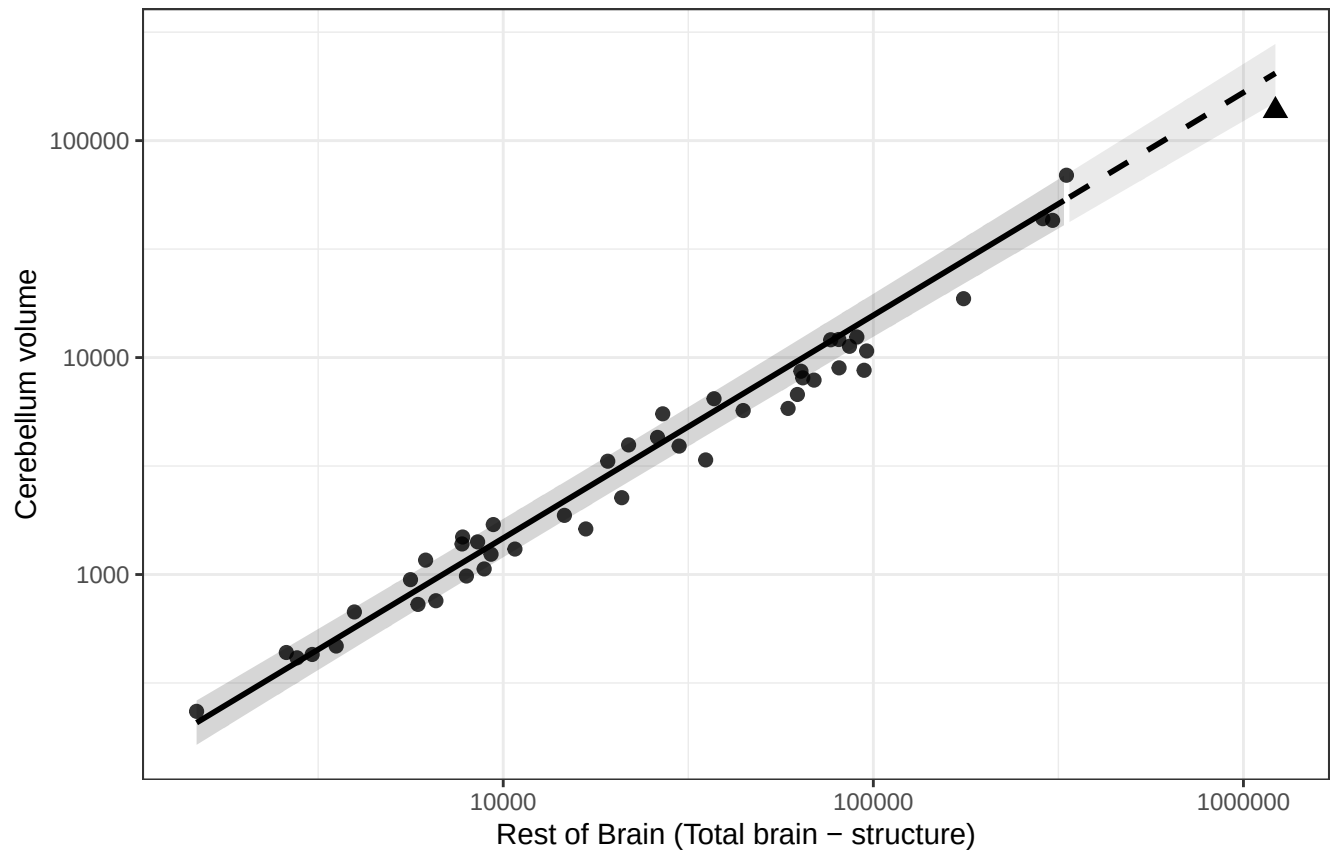

Phylogenetic GLS (BM): Hippocampus vs Rest of Brain

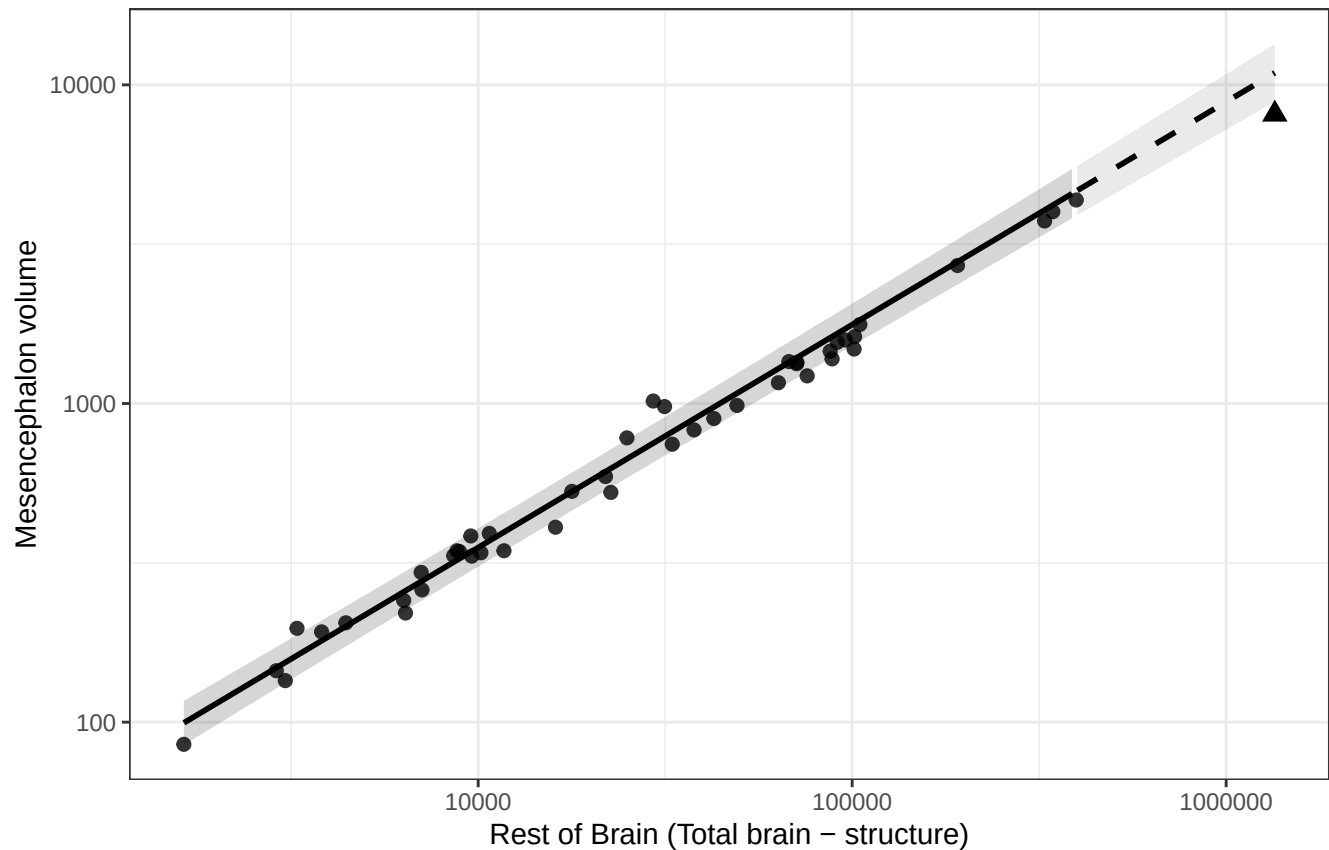

Phylogenetic GLS (BM): Cerebellum vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit extends to human.

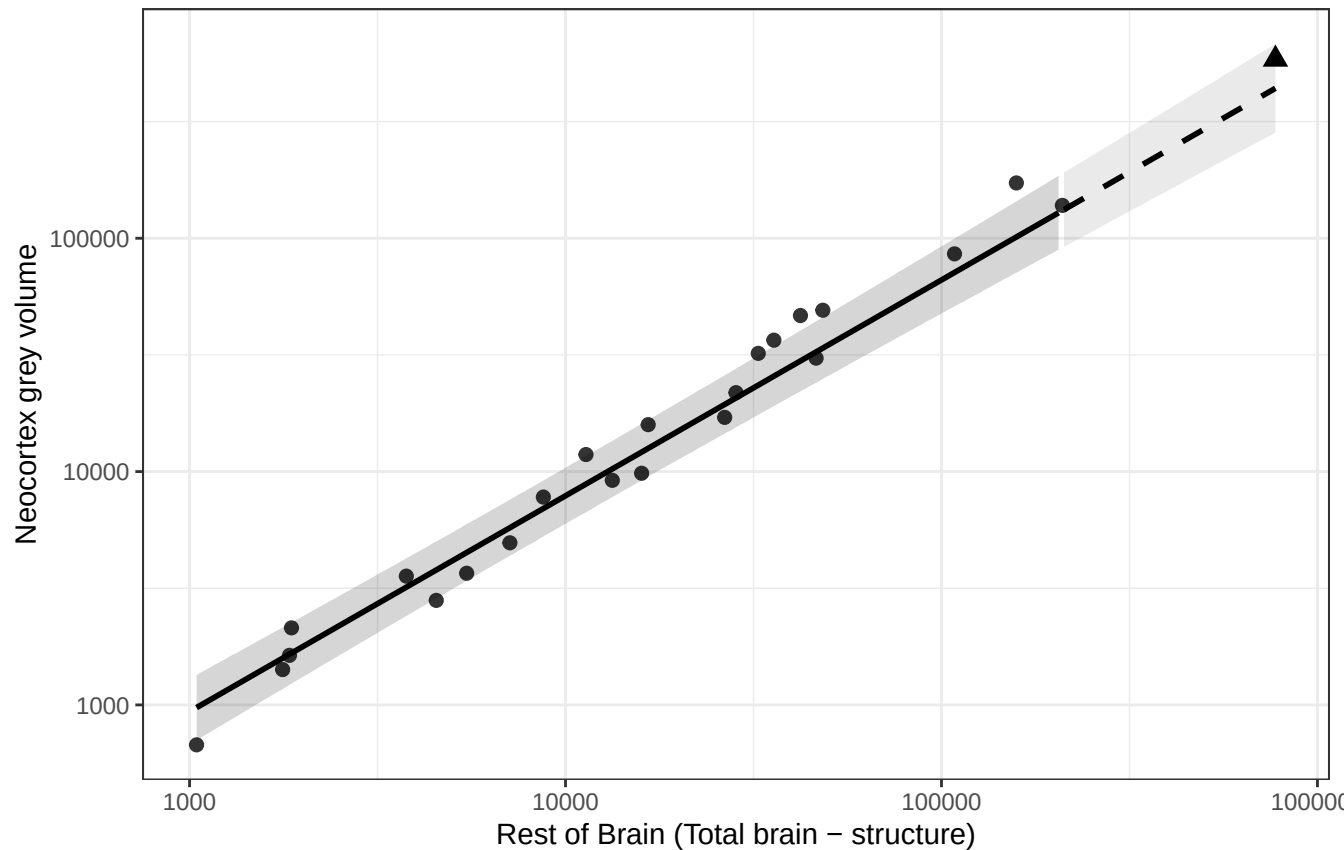

Phylogenetic GLS (BM): Mesencephalon vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit extends to human.

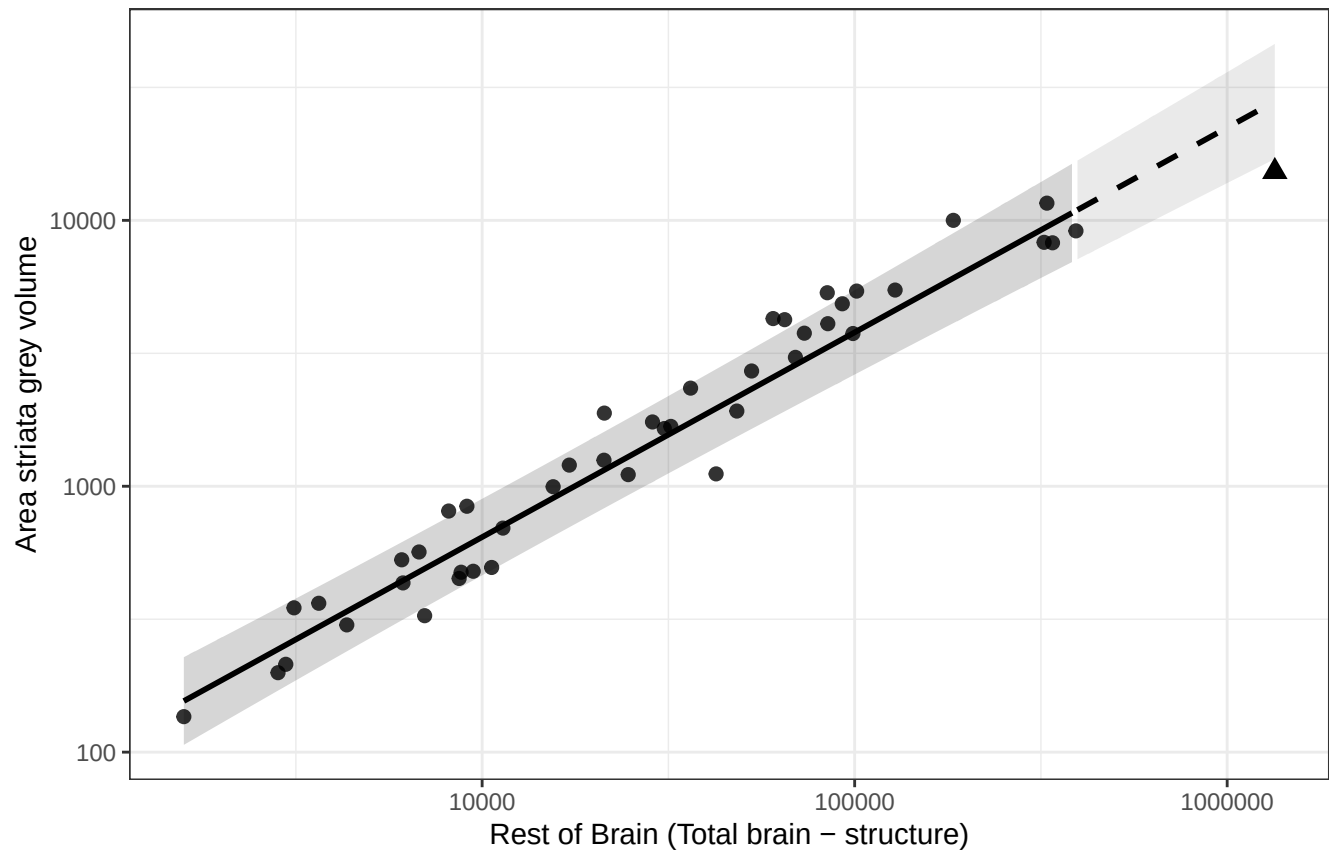

Phylogenetic GLS (BM): Neocortex grey vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit extends

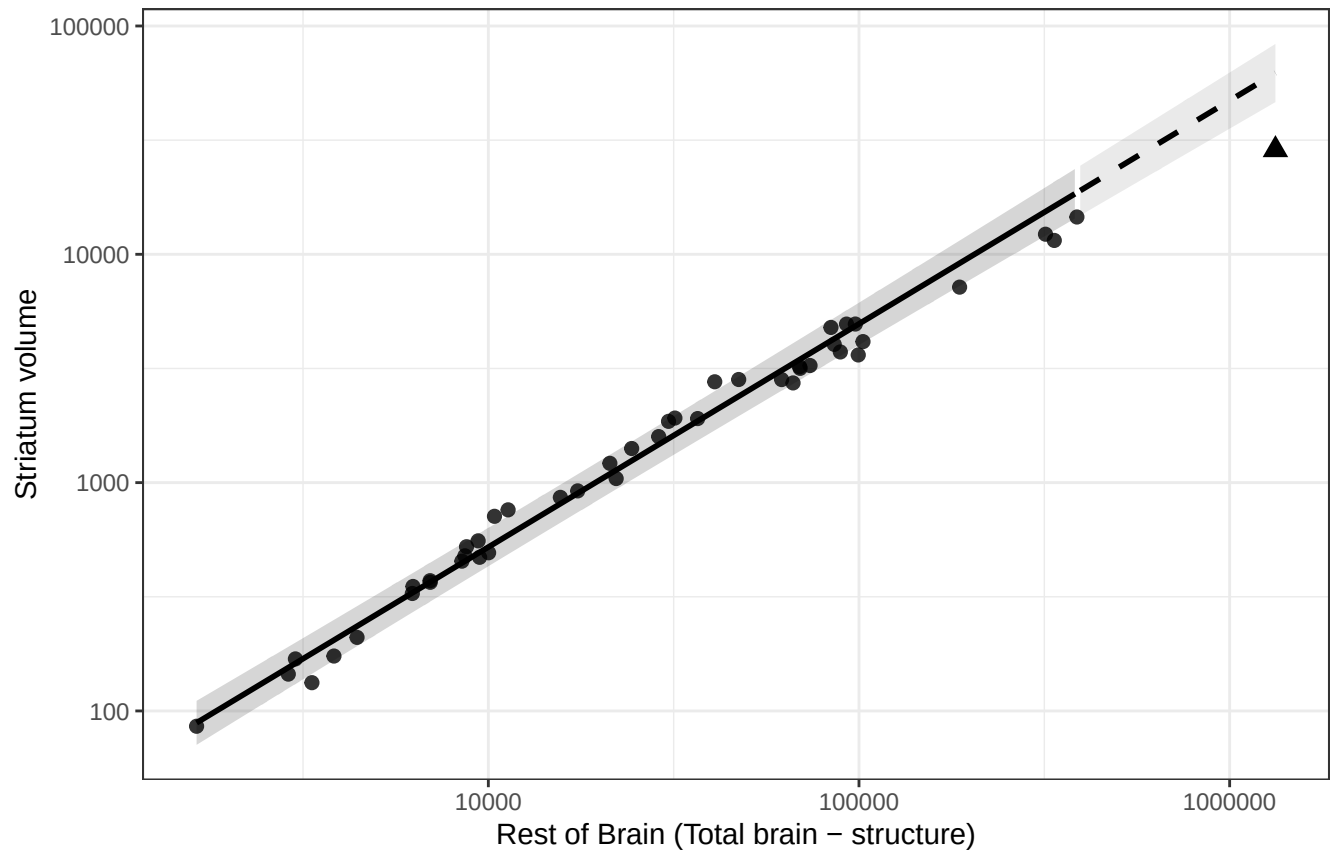

Phylogenetic GLS (BM): Area striata grey vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit ex

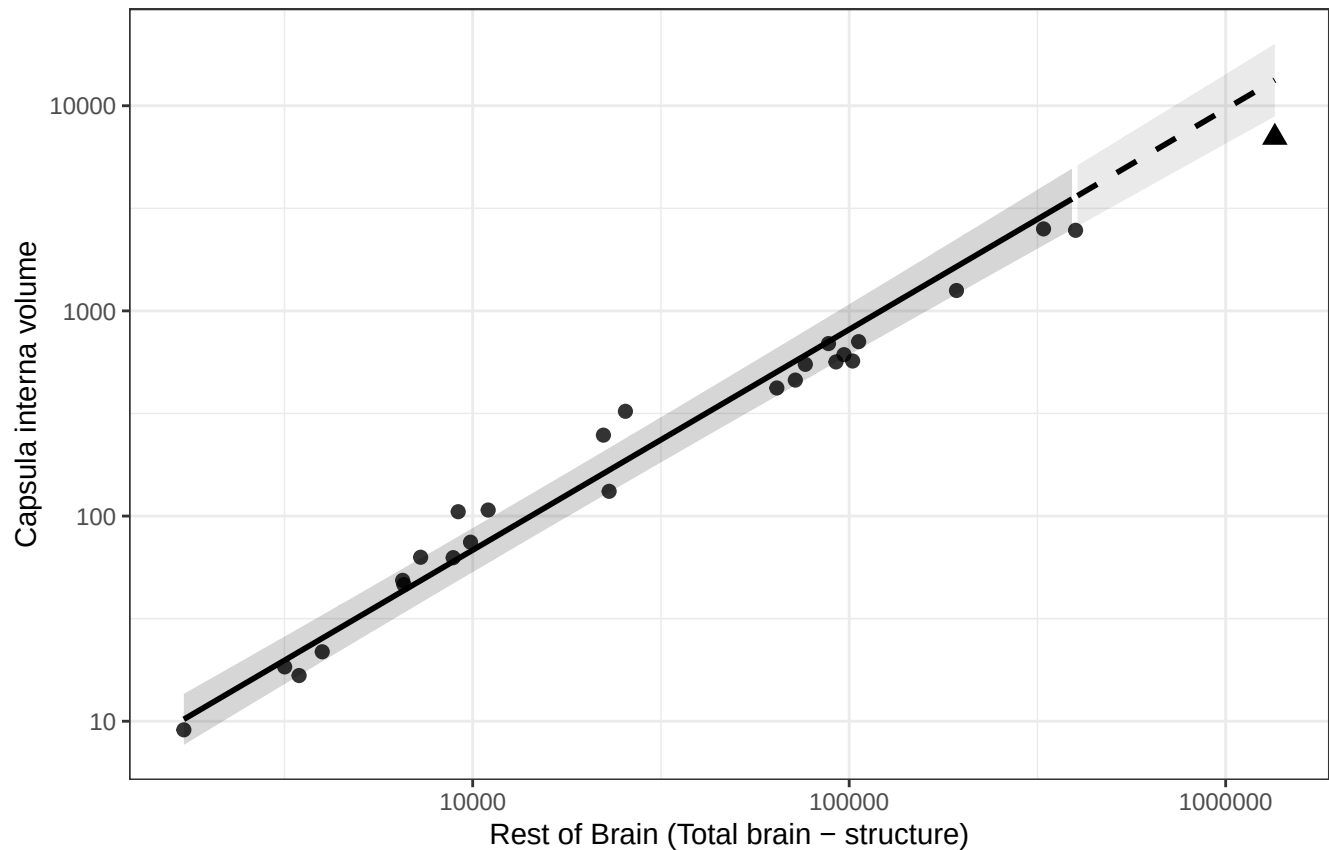

Phylogenetic GLS (BM): Striatum vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit ex

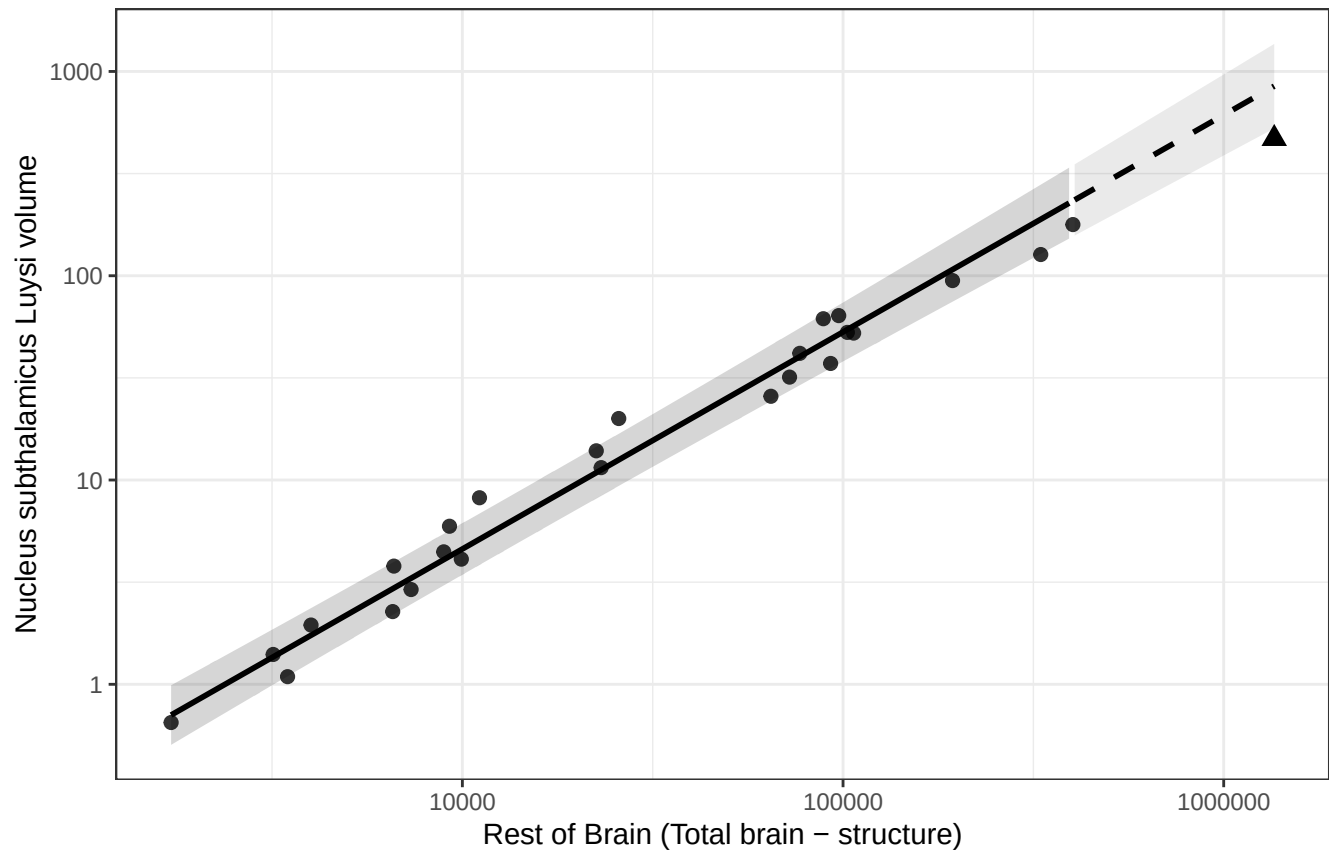

Phylogenetic GLS (BM): Capsula interna vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit extrapolated

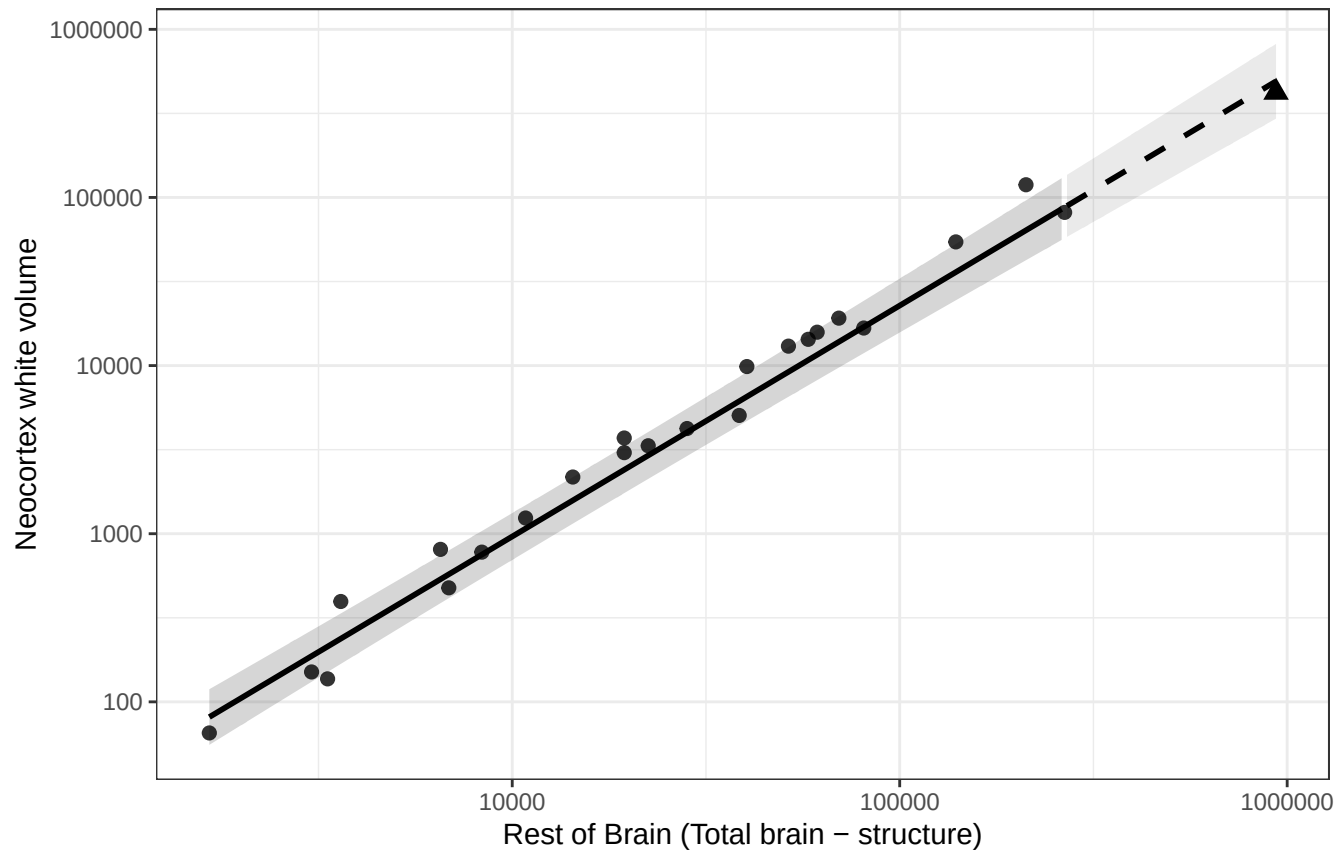

Phylogenetic GLS (BM): Nucleus subthalamicus Luysi vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit excludes human.

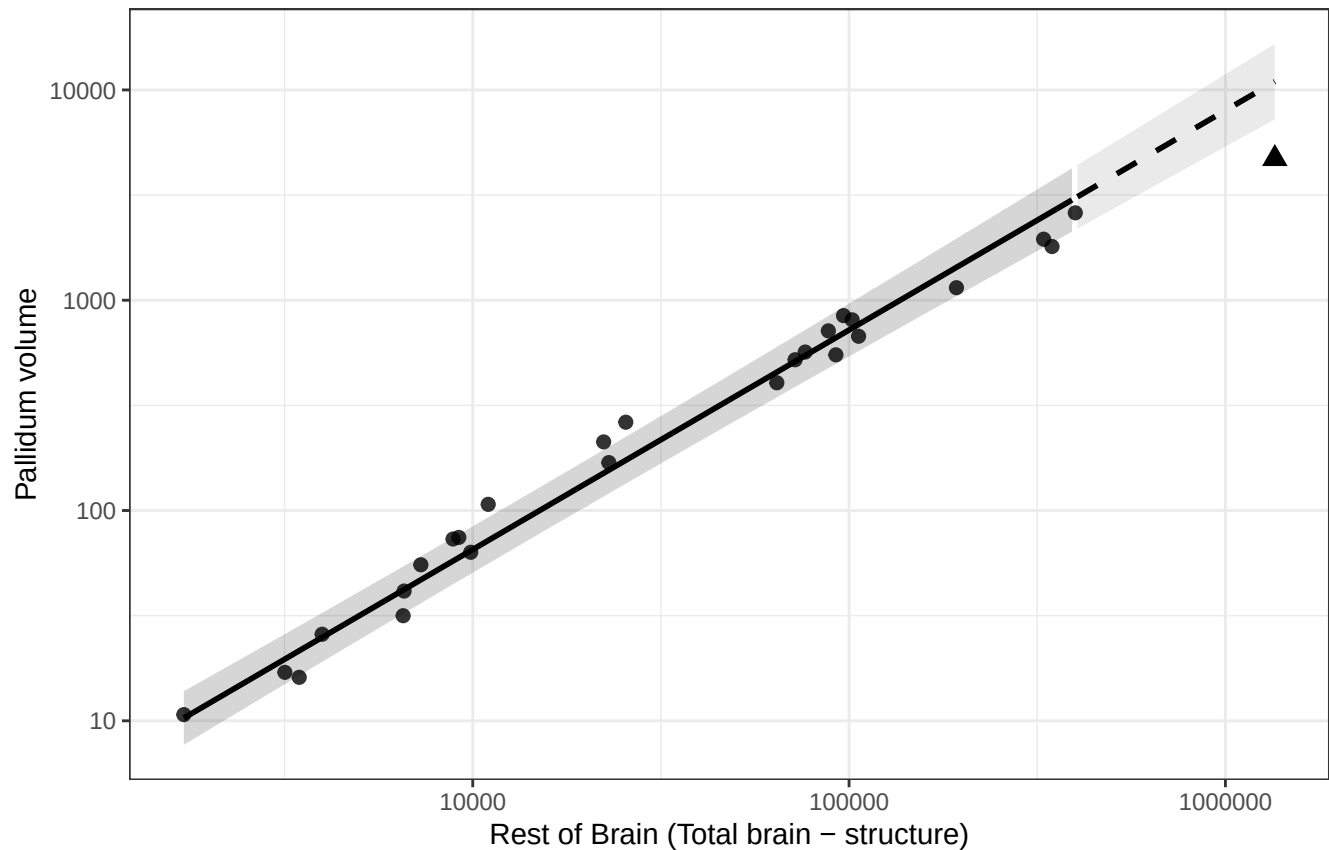

Phylogenetic GLS (BM): Neocortex white vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit e

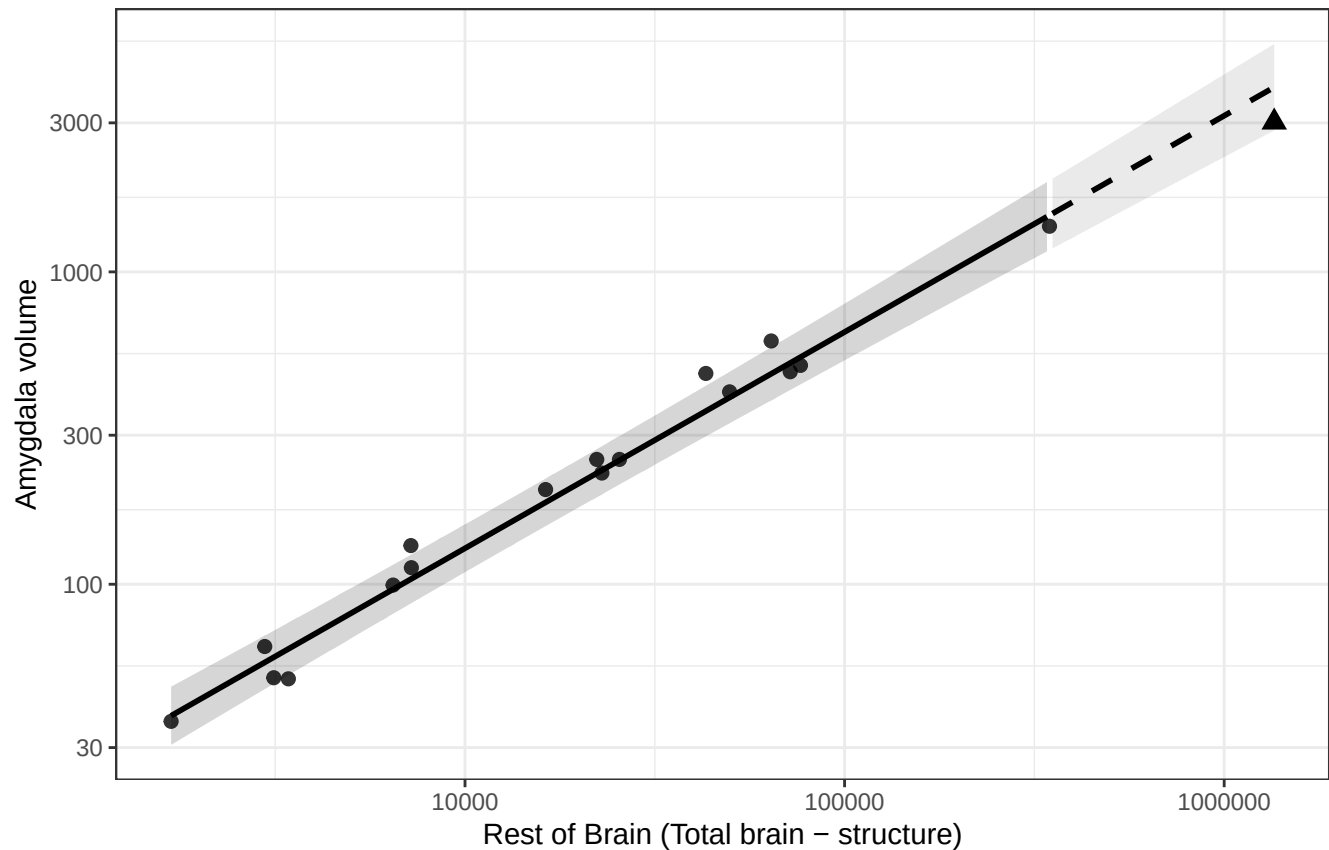

Phylogenetic GLS (BM): Pallidum vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit extrapolated

Phylogenetic GLS (BM): Amygdala vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit excludes human.

Phylogenetic GLS (BM): Corpus geniculatum laterale vs Rest of Brain

Solid = non-human range; dashed = extrapolation to human. Human shown as triangle; fit excluded
