Regional glucose metabolism vs neuronal E:I ratio
Grey = broad E:I in all mapped regions; blue = Jorstad−like E:I in the neocortical subset.
y = 28.8 + 0.0107 x, R² < 0.01, P = 0.967
y = 27.4 + 2.99 x, R² = 0.18, P = 0.478
