Non−telencephalon regions: rCMRGlc vs neuronal supercluster proportion

Amygdala excitatory — rho = −0.39, P = 0.236
Cerebellar inhibitory — rho = 0.27, P = 0.424
CGE interneuron — rho = −0.49, P = 0.129
Deep−layer corticothalamic and 6b — rho = 0.04, P = 0.911
Deep−layer intratelencephalic — rho = 0.17, P = 0.614
Deep−layer near−projecting — rho = −0.10, P = 0.770
Eccentric medium spiny neuron — rho = −0.14, P = 0.684
Hippocampal CA1−3 — rho = −0.64, P = 0.033
Hippocampal CA4 — rho = −0.40, P = 0.223
Hippocampal dentate gyrus — rho = −0.66, P = 0.026
LAMP5−LHX6 and Chandelier — rho = −0.29, P = 0.382
Lower rhombic lip — rho = −0.22, P = 0.516
Mammillary body — rho = −0.51, P = 0.105
Medium spiny neuron — rho = −0.60, P = 0.053
MGE interneuron — rho = −0.33, P = 0.318
Midbrain−derived inhibitory — rho = −0.11, P = 0.739
Miscellaneous — rho = −0.52, P = 0.100
Splatter — rho = −0.15, P = 0.670
Thalamic excitatory — rho = −0.33, P = 0.314
Upper rhombic lip — rho = −0.10, P = 0.770
Upper−layer intratelencephalic — rho = 0.09, P = 0.788

rCMRGlc (µmol/100 g/min.)

Cell−type proportion

Region
- Cerebellar cortex
- Colliculus inferior
- Colliculus superior
- Corpus geniculatum laterale
- Corpus geniculatum mediale
- Nucleus dentatus cerebelli
- Nucleus medial thalami
- Nucleus ruber
- Nucleus subthalamicus
- Substantia nigra
- Vermis
