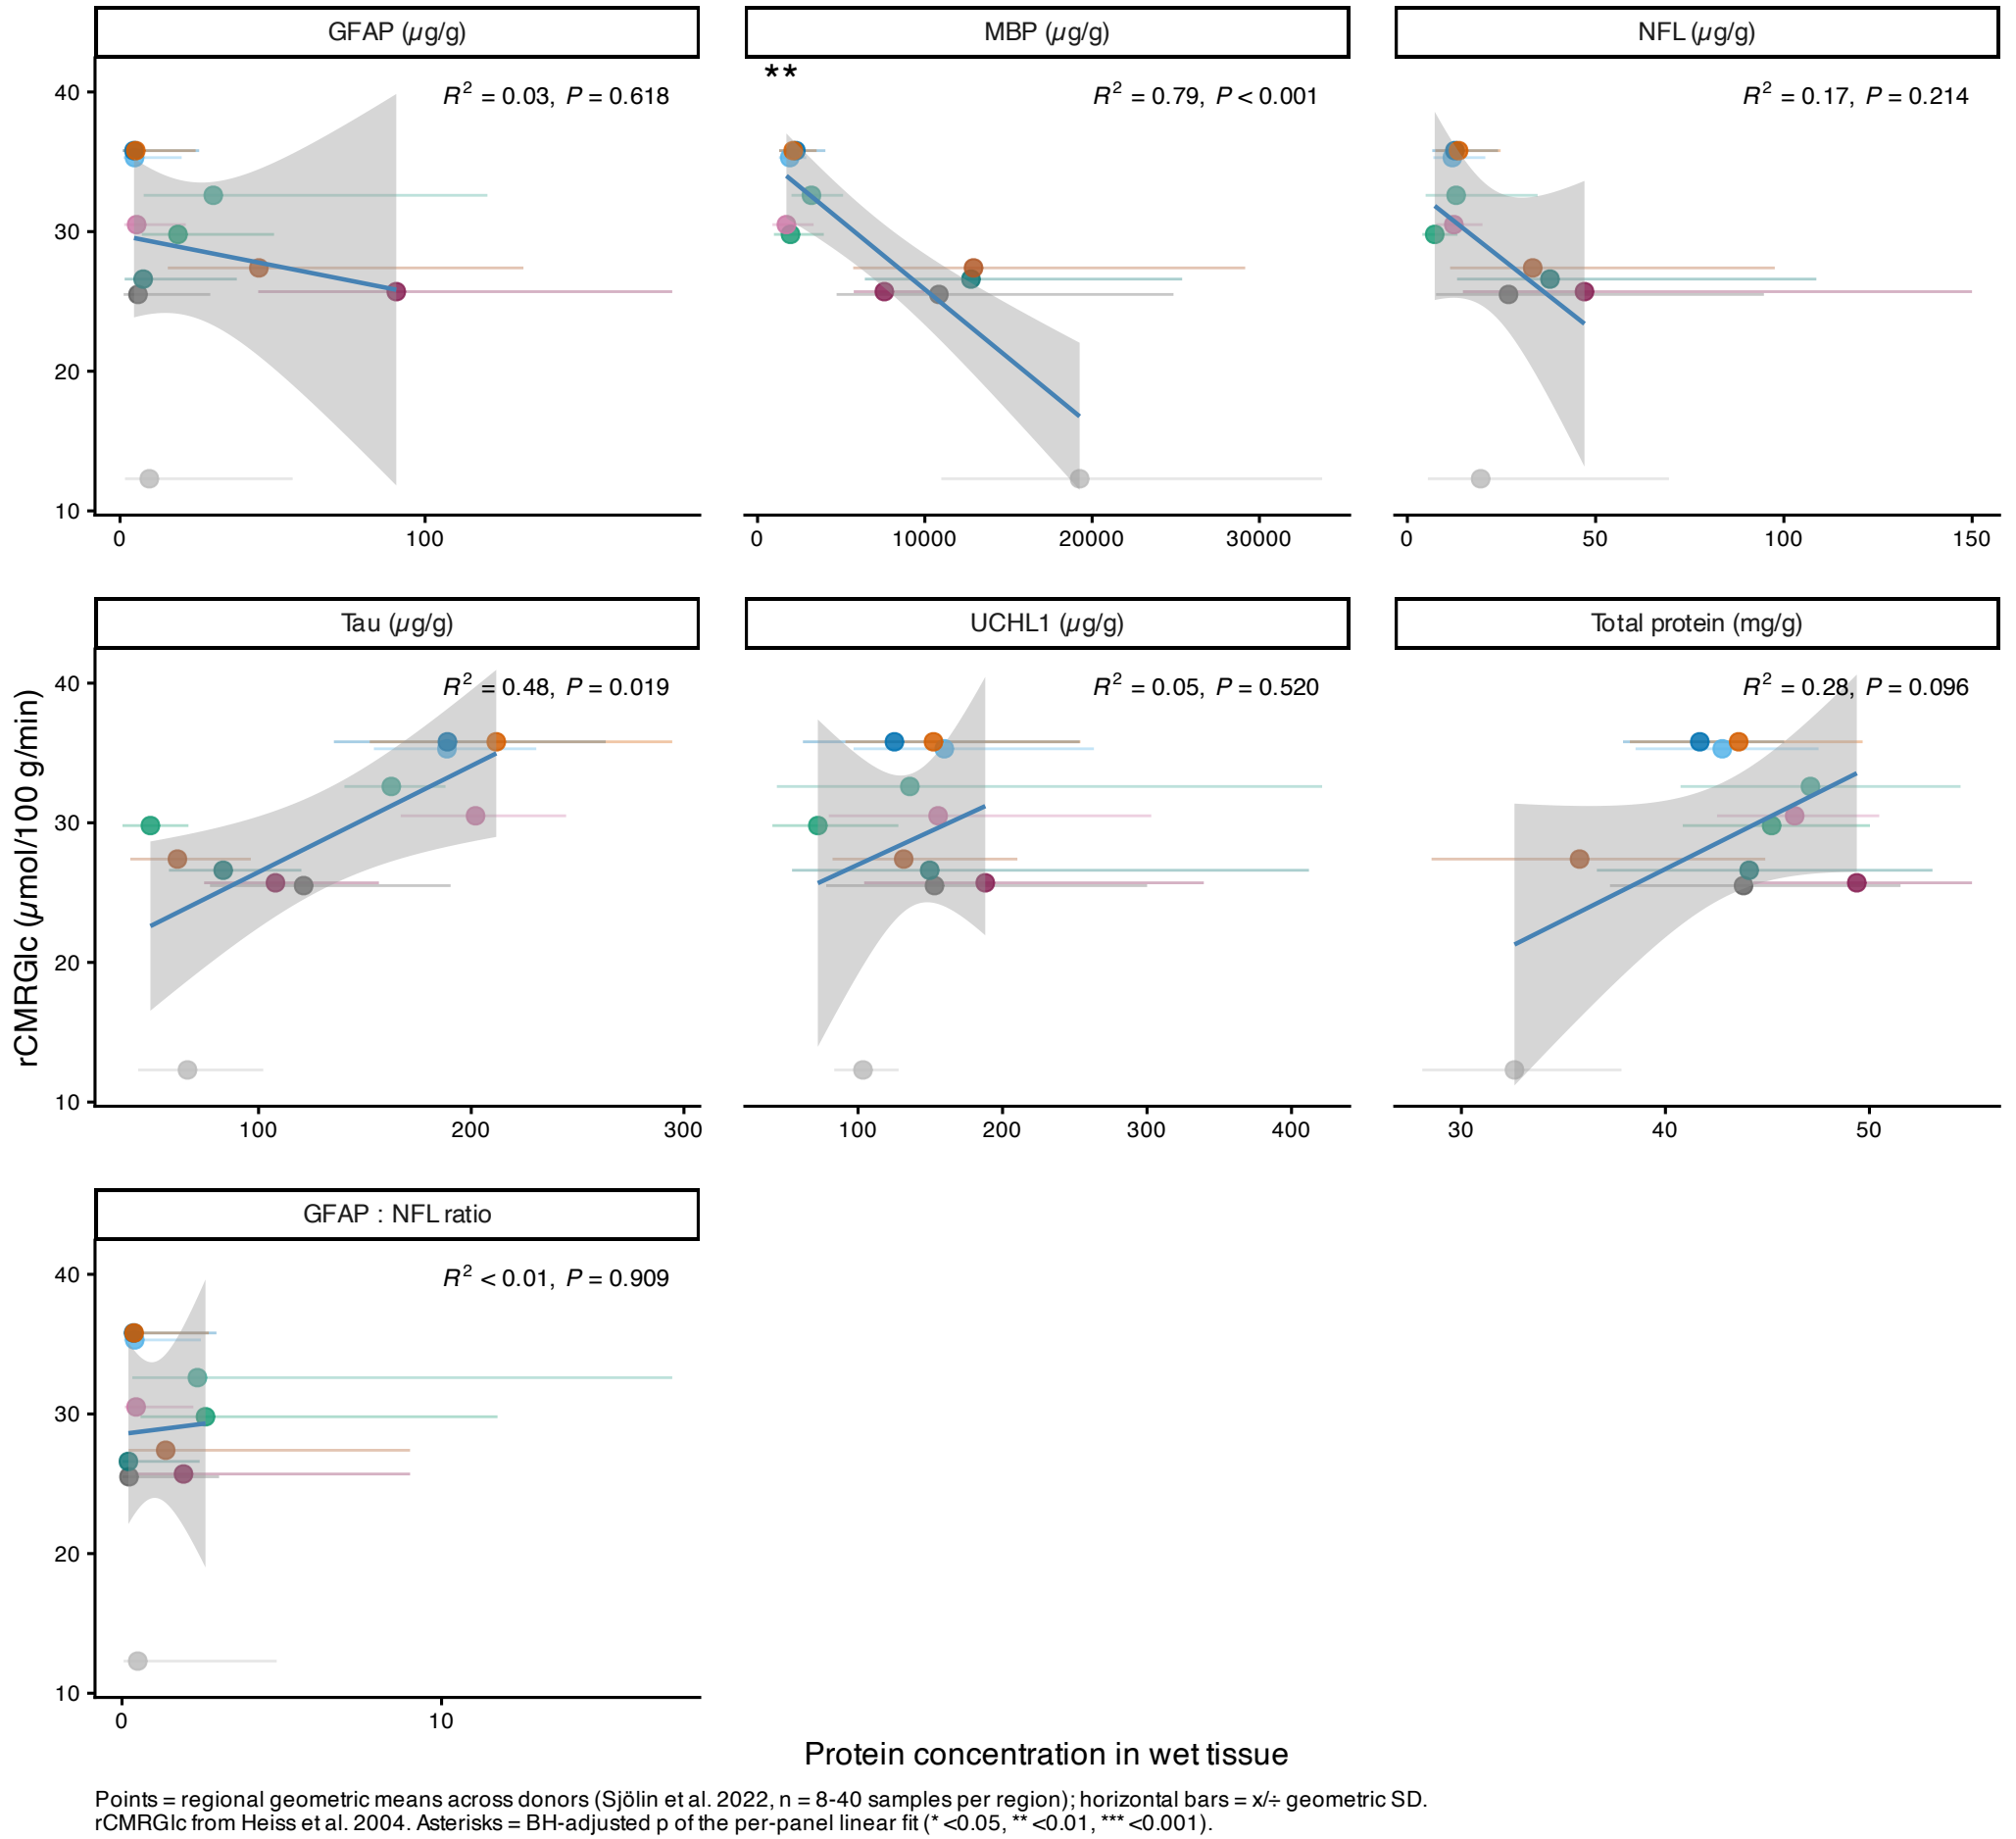
Neuroglial protein concentration vs. glucose metabolic rate across brain regions

Sjölin et al. 2022 (ELISA, μg per g wet tissue) × Heiss et al. 2004 (FDG PET)



Points = regional geometric means across donors (Sjölin et al. 2022, n = 8-40 samples per region); horizontal bars = x/÷ geometric SD.
rCMRGlc from Heiss et al. 2004. Asterisks = BH-adjusted p of the per-panel linear fit (* <0.05, ** <0.01, *** <0.001).
