

Figure 1: Lower triangular matrix showing the pairwise correlations between the 11 brain regions. The diagonal elements are all 1.0. The off-diagonal elements show varying degrees of correlation, with the highest values (around 0.6) between Amygdala and Area striata grey, and between Area striata grey and Capsula interna. The lowest values (around 0.1) are between Capsula interna and Cerebellum, and between Cerebellum and Corpus geniculatum laterale.
