

Absolute regional glucose cost across hominin groups (wedge SIZE = brain volume; wedge LABEL = rate x mass, umol glucose/min; wedge % = share of total brain volume)

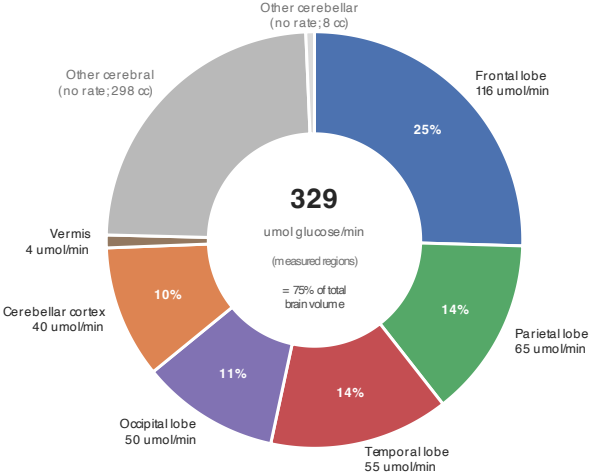

Neanderthal (NT)
total brain volume = 1310 cc

Early modern human (EH)
total brain volume = 1288 cc

Modern human (MH)
total brain volume = 1246 cc

- Frontal lobe
- Temporal lobe
- Cerebellar cortex
- Other cerebral (no rate)
- Parietal lobe
- Occipital lobe
- Vermis
- Other cerebellar (no rate)
